

## **POTENTIAL PROBLEM OF THE DISTRICT**

- **Improper selection of suitable paddy varieties according to land type and topography.**
- **Indiscriminate use of chemical fertilizer in Cereals**
- **High weed infestation in Kharif upland paddy**
- **High cost of cultivation due to lack of farm mechanization in cotton**
- **Post harvest losses in paddy due to mismanagement.**
- **Bacterial and fungal wilt in solanaceous vegetables**
- **Distress sale of onion due to poor storage structure.**
- **Weed infestation in Onion crops lowers the yield**
- **Less no. of female flower and fruit drop in Cucurbitaceous crops.**
- **Alternate bearing habit of local mango cultivar in the district.**
- **Availability of quality seeds of Pulses and Oilseeds (Less than 10 years old)**
- **Line sowing and plant population is not properly maintained in case of pulses & oilseeds**
- **Lack of awareness about use of herbicide, micronutrient application and seed inoculation in oilseed & pulses**
- **Unavailability of Cold tolerant Greengram variety**
